ENGINEERING, PROCUREMENT, CONSTRUCTION &
COMMISSIONING (EPC) OF
PETROLEUM COKE CALCINER PROJECT
KUALA TANJUNG - NORTH SUMATERA, INDONESIA**

No. Specification : SBC-002/PK/II/2020

Date : February 17, 2020

PT INDONESIA ASAHAN ALUMINIUM (Persero)

PT PERTAMINA (Persero)

**QUALIFICATION DOCUMENTS FOR
ENGINEERING, PROCUREMENT, CONSTRUCTION &
COMMISSIONING (EPC) OF
PETROLEUM COKE CALCINER PROJECT
KUALA TANJUNG - NORTH SUMATERA, INDONESIA**

A. General

1. Background

PT Indonesia Asahan Aluminium (Persero) and PT Pertamina (Persero) (hereinafter referred to as “Owner”) plans to hire EPC Contractor (hereinafter referred to as “Bidder”) for conducting Engineering, Procurement, Construction & Commissioning (EPC) works for a Petroleum Coke Calciner plant (hereinafter referred to as “Project”) with the capacity of producing up to 300,000 ton per annum (tpa) of Calcined Petroleum Coke (CPC) (directly or gradually), to a lump sum turn-key (LSTK) contract to supply the technology, detail design, engineering, procurement, manufacturing, transportation, construction, pre-commissioning, commissioning (including start-up and ramp-up) to full production and performance test for each facility and for overall Project, with certain budget and quality as value of works.

The Project will be built by 2 options:

- (i) **OPTION-1** : 300,000 tpa Petroleum Coke Calciner constructed gradually starting from 100,000 tpa, expandable to 300,000 tpa;
- (ii) **OPTION-2** : 300,000 tpa Petroleum Coke Calciner constructed directly.

Detail of plant and facilities inside the calciner can be seen on Attachment-1.

2. Objective

The objective of this qualification is to find qualified EPC Contractor for EPC works bidding of Project as required in this TOR Document.

3. Bidder of Qualification

This qualification can be followed by national and international companies in the form of legal entities as required by the qualification requirements.

4. Procurement Procedure

Procedure for procurement of EPC contractor of the Project shall refer to applicable Procurement System in INALUM.

B. Proposition

1. Prohibition of Corruption, Collusion and Nepotism (Korupsi, Kolusi, dan Nepotisme/KKN) and Fraud

1.1. Bidders and parties related to this procurement are obliged to adhere to ethical

procurement with no action as follows:

- 1.1.1 Attempting to influence members of the Owner in any form and manner, to meet the wishes of the Bidder as opposed to the Qualification Documents, and/or legislation;
 - 1.1.2 Conspiracy with the other Bidder to set the qualifications, so that the reduce / prevent / minimize / eliminate competition and/or harm others;
 - 1.1.3 Create and/or submit documents and/or other information that is not correct to meet the requirements in Qualification Documents.
- 1.2. Bidders based on the Owner assessment that are proven to act as referred to article 1.1 shall be imposed the following matters:
- 1.2.1 Administrative sanctions, such as aborted from the qualification or cancellation of passed qualification;
 - 1.2.2 A civil lawsuit;
 - 1.2.3 Reporting as crime to authorities.
 - 1.2.4 Imposition of sanctions by the Owner.

4.3 Delivery of Tender Document to the Bidder who Passed Qualifications

A Tender Document will be sent to the Bidder who have passed the qualification to enter the offer.

F. Attachment

1. Attachment-1 : Detail of Plant & Facilities inside the Petroleum Coke Calciner Project
2. Attachment-2 : Form Declaration on Document Trueness
3. Attachment-3 : Form Letter of commitment to form joint venture or consortium
4. Attachment-4 : Form Integrity Pact

Attachment-1 : Detail of Plant & Facilities inside the Petroleum Coke Calciner Project

Area	UNIT		REMARKS
1	Calcinations Production System		
	1.1	GPC Conveying System	
	1.2	Petroleum coke warehouse and crush	
	1.3	Petroleum coke blending	
	1.4	Petroleum coke calcination	
	1.5	CPC Conveying System	
2	Utilities and Auxiliary System		
	2.1	Demineralized water station	
	2.2	Waste heat boiler house	
	2.3	Steam turbine house	
	2.4	Flue gas treatment of calcination	
	2.5	Power distribution substation	
	2.6	Comprehensive circulating water	
	2.7	Office building and Control-centre of plant	
	2.8	Refractory material warehouse	
	2.9	Comprehensive repair and spare parts warehouse	
3	General Plan and Transportation		
	3.1	Plant roads	
	3.2	Plant afforestation	
	3.3	Security office	
	3.4	Comprehensive pipeline network
